

Community Impact

We have lost a significant portion of our state funding in the last two years, resulting in a 20% reduction in our workforce.

However, in the year that ended June 30, 2011 we were privileged to serve **4,718** different people in all of our programs and services in Pickerington and Lancaster. We provided **51,298** hours of care to children, adults and families. In a typical month last year we admitted **111** new clients into care and we performed **90** crisis assessments in the Fairfield Medical Center emergency department.

We look forward to another year of service to our community in what will be our 40th year of operation in Fairfield County.

Our mission is to improve the health and well-being of our community through the care we provide and the partnerships we build.
