

Our Psychiatric Care
November, 2011

We currently have a full-time staff psychiatrist vacancy. We are conducting a nationwide search to fill this important position.

In the meantime, we are limited in our ability to provide psychiatric care at both New Horizons as well as Pickerington Area Counseling Service.

We are continuing to experience heavy demand for our psychiatric care. Last year we provided this level of care for 1,564 children, adolescents and adults.

We are still able to provide all other mental health care including diagnostic assessment, counseling/psychotherapy and community psychiatric supportive treatment.

As always, our 24/7 crisis intervention services remain available to all Fairfield County residents. Telephone inquiries may be directed to (740) 687-TALK

We will notify the community as soon as our psychiatry search has been successfully completed.

Thank you for allowing us to be of assistance.

Respectfully,
The New Horizons and PACS staff
